

TEST-ABERDARES-01

89 acres (our measurement) · Flood validation

This plot is not for sale as far as we can tell

This parcel intersects a gazetted protected area. Land inside one is normally not saleable, so a score would invite a comparison that should never be made.

What is nearby

Main road	6 min walk	445 m away
Clinic	12 min drive	8.1 km away
Mobile network mast	14 min drive	9.1 km away
Primary school	15 min drive	10.0 km away
Secondary school	16 min drive	10.6 km away
Tarmac road	28 min drive	18.7 km away
Hospital	29 min drive	19.2 km away
River (a limit on where you can build, not a convenience)	9 min walk	737 m away

Straight-line distance to the nearest mapped feature, not road distance. Health facilities are recorded at the centre of their ward rather than at the building, so treat those as approximate.

Before you pay

1. Ask the seller for written proof this land can be sold
Our data places it inside a protected area. Do not pay anything before you have seen this.
2. Find out where water will come from
We found no mapped water point close to this plot.
3. Confirm the boundary with a licensed surveyor
Our measurements come from maps, not from beacons on the ground.
4. Have your advocate do an official search at the Lands office
We do not check ownership, charges or disputes. Nothing in this report is a substitute for that search.

How we worked this out, and what this report is not

Everything here is measured from satellite images, terrain, rainfall records and public datasets. Nobody from our team has stood on this land. This is not a valuation and not a legal opinion. It does not confirm who owns the land or where its legal boundary runs. Flood risk is worked out from the shape of the land, not from flood records. It cannot see a broken dike or a blocked drain. Always visit the plot and use an advocate and a licensed surveyor before you pay any money.
