

TEST-KANO-01

40 acres (our measurement) · Flood validation

89 / 100 — Good Best for farming.

We do not recommend this plot for holding as an investment — it scores 32 out of 100 for that. The reasons are below.

The overall figure is the best of the four, not their average. Land is bought for a purpose.

The four things people ask

Can I build a house here?

Not on all of it

Part of this plot falls inside a river reserve, which by law you cannot build on.

What this means for you

Have a surveyor mark the reserve on the ground before you plan anything. What is left may still be buildable.

We're fairly confident about this.

Can I farm it?

Yes — this is good growing land

Heavy, reliable rain of about 1,564 mm a year.

What this means for you

Proper farming land. If it also floods, that is the same water that makes the soil rich — plan for it rather than against it.

We're fairly confident about this.

Will it flood?

Yes, it floods

A large part of this plot is in the highest flood categories, and so is the land around it.

What this means for you

Expect water here in a heavy season. Ask neighbours how high it came last time — they will know better than any map.

We're fairly confident about this.

Is this area growing?

Yes, steadily

There is real growth in night-time lights, but not at the pace of the fastest peri-urban areas.

What this means for you

Steady area. Buy for what you will use it for, not for a quick rise.

We're fairly confident about this.

What is nearby

On the land itself: river — this crosses the plot rather than sitting near it.

Main road	1 min walk	41 m away
Mobile network mast	5 min walk	369 m away
Primary school	7 min walk	530 m away
Tarmac road	7 min walk	556 m away
Secondary school	8 min walk	606 m away
Water point	17 min walk	1.3 km away
Clinic	6 min drive	3.9 km away
Hospital	7 min drive	4.7 km away

Straight-line distance to the nearest mapped feature, not road distance. Health facilities are recorded at the centre of their ward rather than at the building, so treat those as approximate.

Before you pay

- 1. Ask the county where the river reserve runs**
You cannot build inside it. A surveyor can mark it on the ground.
- 2. Have a builder price the foundation for black cotton**
So the cost is known before you pay for the land.
- 3. Ask neighbours how high the water came last season**
Our flood reading is worked out from the shape of the land. It cannot see a blocked drain or a broken dike.
- 4. Confirm the boundary with a licensed surveyor**
Our measurements come from maps, not from beacons on the ground.
- 5. Have your advocate do an official search at the Lands office**
We do not check ownership, charges or disputes. Nothing in this report is a substitute for that search.

How we worked this out, and what this report is not

Everything here is measured from satellite images, terrain, rainfall records and public datasets. Nobody from our team has stood on this land. This is not a valuation and not a legal opinion. It does not confirm who owns the land or where its legal boundary runs. Flood risk is worked out from the shape of the land, not from flood records. It cannot see a broken dike or a blocked drain. Always visit the plot and use an advocate and a licensed surveyor before you pay any money.
