0.89 acres (our measurement) · Development signal

83 / 100 — Good Best for building a home.

The overall figure is the best of the four, not their average. Land is bought for a purpose.

The four things people ask

Can I build a house here?

Yes, but budget for the foundation

This is black cotton soil. It swells and shrinks with moisture.

What this means for you

You can build here, but the footings cost more. Get a soil test and have a builder price it before you commit.

We're fairly confident about this.

Can I farm it?

With care

Rain is moderate at about 700 mm a year, and in the driest years it drops to 81% of that.

What this means for you

Drought-hardy crops or grazing. Anything else needs a water source.

We're fairly confident about this.

Will it flood?

No flooding expected

The whole plot sits on ground that sheds water rather than collecting it.

What this means for you

Flooding is not a concern here.

We're fairly confident about this.

Is this area growing?

Yes, and quickly

Lights at night here have been increasing fast, which is what happens when people build.

What this means for you

This area is on the way up. That usually shows in land prices.

We're fairly confident about this.

What is nearby

Main road

1 min walk

94 m away

Mobile network mast

5 min walk

402 m away

Clinic	18 min walk	1.5 km away
Hospital	18 min walk	1.5 km away
Primary school	7 min drive	4.7 km away
Secondary school	9 min drive	5.9 km away
Water point	11 min drive	7.4 km away
Tarmac road	14 min drive	9.4 km away
River (a limit on where you can build, not a convenience)	12 min walk	950 m away

Straight-line distance to the nearest mapped feature, not road distance. Health facilities are recorded at the centre of their ward rather than at the building, so treat those as approximate.

Before you pay

1. Have a builder price the foundation for black cotton

So the cost is known before you pay for the land.

2. Find out where water will come from

We found no mapped water point close to this plot.

3. Confirm the boundary with a licensed surveyor

Our measurements come from maps, not from beacons on the ground.

4. Have your advocate do an official search at the Lands office

We do not check ownership, charges or disputes. Nothing in this report is a substitute for that search.

How we worked this out, and what this report is not

Everything here is measured from satellite images, terrain, rainfall records and public datasets. Nobody from our team has stood on this land. This is not a valuation and not a legal opinion. It does not confirm who owns the land or where its legal boundary runs. Flood risk is worked out from the shape of the land, not from flood records. It cannot see a broken dike or a blocked drain. Always visit the plot and use an advocate and a licensed surveyor before you pay any money.
